PROFESSIONAL SUMMARY

AWS Cloud Engineer and MCA graduate with hands-on experience architecting and deploying scalable, high-availability cloud infrastructure on AWS. Proficient in EC2, VPC, IAM, RDS, ALB, Auto Scaling, CloudWatch, and S3. Skilled in Linux administration, cloud networking, CI/CD pipelines, and DevOps fundamentals. Seeking an entry-level AWS Cloud or DevOps role.

TECHNICAL SKILLS

AWS Cloud: EC2, S3, VPC, IAM, RDS, ALB, Auto Scaling, CloudWatch, Route 53, ECS, EKS
DevOps & CI/CD: Git, GitHub, Jenkins, GitHub Actions, CI/CD Pipelines, Docker, Kubernetes (K8s), Jira
Infrastructure & Automation: Terraform, Ansible, AWS CloudFormation, AWS CLI
Monitoring: Prometheus, Grafana, CloudWatch
Operating Systems & Scripting: Linux (Ubuntu, Amazon Linux), Shell Scripting
Networking: TCP/IP, DNS, HTTP/HTTPS, Subnets, Security Groups, Load Balancing
Database & Web (Basics): MySQL, HTML, CSS

PROJECTS

AWS 3-Tier Architecture with Auto Scaling (Individual)

Technologies: AWS (EC2, ALB, Auto Scaling, RDS, VPC, IAM, CloudWatch)

- Deployed a fault-tolerant 3-tier web app on AWS achieving high availability across 2 AZs.
- Architected a custom VPC with public/private subnets, IGW, and NAT Gateway for secure traffic isolation.
- Configured ALB to distribute traffic across EC2 instances, improving load distribution and uptime.
- Implemented Auto Scaling Group with launch templates, enabling elastic scaling under variable load.
- Provisioned Amazon RDS (MySQL) in a private subnet ensuring managed, secure database operations.
- Applied least-privilege IAM roles and Security Groups to enforce zero-trust access control.
- Deployed CloudWatch alarms and dashboards to monitor CPU, latency, and request count in real time.

AI Book Recommender Website – Academic Project (Group)

Technologies: HTML, CSS, PHP, MySQL (on AWS)

- Built a PHP and MySQL-based book recommendation platform hosted on AWS EC2.
- Designed a normalized relational database schema to handle users, books, and recommendation data.
- Deployed the application on EC2 with Apache, enabling scalable and reliable web hosting.
- Integrated Amazon RDS (MySQL) for managed, cloud-native database storage and backup.
- Enforced access control using Security Groups and EC2 key pairs for production-level security.

INTERNSHIP

Cravita Technologies India Pvt Ltd, Pune

December 2025 – Present

Trainee AWS Cloud Engineer

- Provisioning and managing AWS resources — EC2, S3, VPCs, IAM roles, and RDS — for live projects.
- Assisting in CI/CD pipeline setup and cloud-based application deployment on Linux servers.
- Monitoring cloud infrastructure health using CloudWatch alarms, logs, and performance metrics.
